Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Applicants respectfully request that it be noted that applicants do not fully agree with the Statement of Reasons for Allowance. In particular, applicants note that the Examiner states that the instant invention relates to compounds useful in treating bovine diarrhea virus and "pestivirus related hepatitis C viral infections." Applicants note that hepatitis C is caused by a virus of the *Flaviviridae* family of viruses. Applicants note that claims 78 and 84 both recite methods of treating "*Flaviviridae*-related hepatitis C infection."

Applicants further note that the present claims are directed to compounds that comprise furan, benzimidazole and phenyl groups. These groups may be substituted by a variety of other functional groups. The Examiner's Statement on Reasons for Allowance recites that the aryl and benzimidazolyl groups do not simultaneously have amidine substituents. Applicants note that the presently claimed compounds comprise a cationic group, A, selected from:

wherein R_6 is H, alkyl or aryl; and R_7 and R_8 are each independently selected from the group consisting of H and alkyl. Thus, the present compounds can comprise an amidine, substituted amidine, cyclic amidine, guanidine, or substituted guanidine substituent(s).

Accordingly, the Statement of Reasons for Allowance should not be used to interpret the cited claims, particularly to the extent that any part of the Statement differs from the express language of the claims and/or applicants' positions on patentability of those claims. It is respectfully submitted that the allowed claims should be entitled the broadest reasonable interpretation and broadest range of equivalents that are appropriate in light of the language of the claims, the supporting disclosure and applicants' prosecution of the claims, without reference to the Statement of Reasons for Allowance.
